CONTENTS

NUMBER 1

M. W. Reeks and D. Hall	1	Kinetic models for particle resuspension in turbulent flows: theory and measurement
J. Wagner and D. Leith	33	Field tests of a passive aerosol sampler
C. Böckmann and J. Wauer	49	Algorithms for the inversion of light scattering data from uniform and non-uniform particles
M. Quinten, R. Friehmelt and K.-F. Ebert	63	Sizing of aggregates of spheres by a white-light optical particle counter with 90° scattering angle
D. Katoshevski, B. Zhao, G. Ziskind and E. Bar-Ziv	73	Experimental study of the drag force acting on a heated particle
A. A. Onischuk, V. P. Strunin, V. V. Karasev and V. N. Panfilov	87	Formation of electrical dipoles during agglomeration of uncharged particles of hydrogenated silicon
B. U. Lee and S. S. Kim	107	Thermophoresis in the cryogenic temperature range
A. C. K. Lai, M. A. Byrne and A. J. H. Goddard	121	Aerosol deposition in turbulent channel flow on a regular array of three-dimensional roughness elements
M. Chang, C. Sioutas, F. R. Cassee and P. H. B. Fokkens	139	Field evaluation of a mobile high-capacity particle size classifier (HCPSC) for separate collection of coarse, fine and ultrafine particles
D. F. Banse, K. Esfeld, M. Hermann, B. Sierau and A. Wiedensohler	157	Particle counting efficiency of the TSI CPC 3762 for different operating parameters
	163	Book review

NUMBER 2

B. W. Lee, J. I. Jeong, J. Y. Hwang, M. Choi and S. H. Chung	165	Analysis of growth of non-spherical silica particles in a counterflow diffusion flame considering chemical reactions, coagulation and coalescence
S. H. Park, K. W. Lee, M. Shimada and K. Okuyama	187	Alternative analytical solution to condensational growth of polydisperse aerosols in the continuum regime

B. Gorbunov, A. Baklanov, N. Kakutkina, H. L. Windsor and R. Toumi — 199 — Ice nucleation on soot particles

C. F. Clement, L. Pirjola, M. dal Maso, J. M. Mäkelä and M. Kulmala — 217 — Analysis of particle formation bursts observed in Finland

R. Marks, K. Kruczalak, K. Jankowska and M. Michalska — 237 — Bacteria and fungi in air over the Gulf of Gdańsk and Baltic sea

C. H. Kim and J. W. Lee — 251 — A new collection efficiency model for small cyclones considering the boundary-layer effect

L. C. Kenny, R. J. Aitken, G. Beaumont and P. Görner — 271 — Investigation and application of a model for porous foam aerosol penetration

M. Alonso, F. J. Alguacil, T. Nomura and Y. Kousaka — 287 — Examination of after-charging effects downstream of an aerosol neutralizer

NUMBER 3

B. Helfgen, P. Hils, Ch. Holzknecht, M. Türk and K. Schaber — 295 — Simulation of particle formation during the rapid expansion of supercritical solutions

T. W. Chan and M. Mozurkewich — 321 — Measurement of the coagulation rate constant for sulfuric acid particles as a function of particle size using tandem differential mobility analysis

S. P. Bakanov, J. Smolík, Sh. Kh. Zaripov and V. Ždímal — 341 — Continuum regime motion of a growing droplet in opposing thermo-diffusiophoretic and gravitational fields of a thermal diffusion cloud chamber

J. Hienola, M. Kulmala and A. Laaksonen — 351 — Condensation and evaporation of water vapor in mixed aerosols of liquid droplets and ice: numerical comparison of growth rate expressions

C.-H. Huang and C.-J. Tsai — 375 — Effect of gravity on particle collection efficiency of inertial impactors

A. Virtanen, M. Marjamäki, J. Ristimäki and J. Keskinen — 389 — Fine particle losses in electrical low-pressure impactor

E. P. Emets, G. Yu. Kolomeitsev, S. V. Mikheikin and P. P. Poluektov — 403 — Use of a correlation method for studying aerosol generation effects

J. Zwoździak, P. Jadczyk and J. Kucharczyk — 409 — Seasonal variability of the mutagenicity of airborne particles in the town center

425 Announcement

NUMBER 4

H. Burtscher, U. Baltensperger, N. Bukowiecki, P. Cohn, C. Hüglin, M. Mohr, U. Matter, S. Nyeki, V. Schmatloch, N. Streit and E. Weingartner — 427 — Separation of volatile and non-volatile aerosol fractions by thermodesorption: instrumental development and applications

M. Baskaran and G. E. Shaw — 443 — Residence time of arctic haze aerosols using the concentrations and activity ratios of ^{210}Po, ^{210}Pb and ^{7}Be

I. Queralt, T. Sanfeliu, E. Gomez and C. Alvarez — 453 — X-ray diffraction analysis of atmospheric dust using low-background supports

P. A. Tanner, P. T. Law and W. F. Tam — 461 — Comparison of aerosol and dry deposition sampled at two sites in Southern China

R. Tsai and L. J. Liang — 473 — Correlation for thermophoretic deposition of aerosol particles onto cold plates

A. M. Brasil, T. L. Farias, M. G. Carvalho and U. O. Koylu — 489 — Numerical characterization of the morphology of aggregated particles

S. di Stasio — 509 — Observation of restructuring of nanoparticle soot aggregates in a diffusion flame by static light scattering

M. Shams, G. Ahmadi and H. Rahimzadeh — 525 — Transport and deposition of flexible fibers in turbulent duct flows

R. Xiang, S. H. Park and K. W. Lee — 549 — Effects of cone dimension on cyclone performance

563 Book review

NUMBER 5

J. I. Jeong and M. Choi 565 A sectional method for the analysis of growth of polydisperse non-spherical particles undergoing coagulation and coalescence

R. P. Camata, H. A. Atwater and R. C. Flagan 583 Space-charge effects in nanoparticle processing using the differential mobility analyzer

J. Y. Hwang, Y. S. Gil, J. I. Kim, M. Choi and S. H. Chung 601 Measurements of temperature and OH radical distributions in a silica generating flame using CARS and PLIF

P. P. Ahonen, J. Joutsensaari, O. Richard, U. Tapper, D. P. Brown, J. K. Jokiniemi and E. I. Kauppinen 615 Mobility size development and the crystallization path during aerosol decomposition synthesis of TiO_2 particles

A. Voutilainen and J. P. Kaipio 631 Estimation of non-stationary aerosol size distributions using the state-space approach

A. Keil and M. Wendisch 649 Bursts of Aitken mode and ultrafine particles observed at the top of continental boundary layer clouds

Z. Wang, T. Reponen, S. A. Grinshpun, R. L. Górny and K. Willeke 661 Effect of sampling time and air humidity on the bioefficiency of filter samplers for bioaerosol collection

M. Shin and J. W. Lee 675 Memory effect in the Eulerian particle deposition in a fully developed turbulent channel flow

695 Announcement

NUMBER 6

E. F. Mikhailov, S. S. Vlasenko, L. Krämer and R. Niessner 697 Interaction of soot aerosol particles with water droplets: influence of surface hydrophilicity

S. L. Clegg, J. H. Seinfeld and P. Brimblecombe 713 Thermodynamic modelling of aqueous aerosols containing electrolytes and dissolved organic compounds

J. Smolík, L. Džumbová, J. Schwarz and M. Kulmala 739 Evaporation of ventilated water droplet: connection between heat and mass transfer

S. J. Harris and M. M. Maricq 749 Signature size distributions for diesel and gasoline engine exhaust particulate matter

C. D. Clark, P. Campuzano-Jost, D. S. Covert, R. C. Richter, H. Maring, A. J. Hynes and E. S. Saltzman — 765 — Real-time measurement of sodium in single aerosol particles by flame emission: laboratory characterization

V. Aizenberg, K. Choe, S. A. Grinshpun, K. Willeke and P. A. Baron — 779 — Evaluation of personal aerosol samplers challenged with large particles

C. K. Man and M. Y. Shih — 795 — Light scattering and absorption properties of aerosol particles in Hong Kong

D. Y. Lee and J. W. Lee — 805 — Dispersion during exhalation of an aerosol bolus in a double bifurcation

B. Asgharian, W. Hofmann and F. J. Miller — 817 — Mucociliary clearance of insoluble particles from the tracheobronchial airways of the human lung

NUMBER 7

Special Issue
Mass Accommodation and Uptake Coefficients

M. Kulmala and P. E. Wagner — 833 — Mass accommodation and uptake coefficients — a quantitative comparison

T. Vesala, A. U. Hannemann, B. P. Luo, M. Kulmala and Th. Peter — 843 — Rigorous treatment of time-dependent trace gas uptake by droplets including bulk diffusion and surface accommodation

X. Qu and E. J. Davis — 861 — Droplet evaporation and condensation in the near-continuum regime

D. R. Worsnop, Q. Shi, J. T. Jayne, C. E. Kolb, E. Swartz and P. Davidovits — 877 — Gas-phase diffusion in droplet train measurements of uptake coefficients

Y. Katrib, G. Deiber, F. Schweitzer, P. Mirabel and C. George — 893 — Chemical transformation of bromine chloride at the air/water interface

R. Rudolf, A. Vrtala, M. Kulmala, T. Vesala, Y. Viisanen and P. E. Wagner — 913 — Experimental study of sticking probabilities for condensation of nitric acid — water vapor mixtures

NUMBER 8

J. Kuśmierczyk-Michulec, M. Schulz, S. Ruellan, O. Krüger, E. Plate, R. Marks, G. de Leeuw and H. Cachier — 933 — Aerosol composition and related optical properties in the marine boundary layer over the Baltic Sea

J. C. Barrett and T. J. Baldwin 957 Aerosol nucleation and growth during laminar tube flow. II: quenching effects and wall condensation

M. Hermann and A. Wiedensohler 975 Counting efficiency of condensation particle counters at low-pressures with illustrative data from the upper troposphere

A. T. Zimmer and P. Biswas 993 Characterization of the aerosols resulting from arc welding processes

I. E. Agranovski and M. Shapiro 1009 Clogging of wet filters by dust particles

1021 The 5th aerosol conference of the Hungarian Aerosol Society

1033 Announcement

NUMBER 9

C.-H. Huang, C.-J. Tsai and T.-S. Shih 1035 Particle collection efficiency of an inertial impactor with porous metal substrates

M. Katzer, A. P. Weber and G. Kasper 1045 The effects of electrical fields on growth of titania particles formed in a CH_4–O_2 diffusion flame

F. Dulac, P. Chazette, L. Gomes, B. Chatenet, H. Berger and J. M. Vinicula Dos Santos 1069 A method for aerosol profiling in the lower troposphere with coupled scatter and meteorological rawindsondes and first data from the tropical Atlantic off Sahara

G. Mainelis, K. Willeke, P. Baron, T. Reponen, S. A. Grinshpun, R. L. Górny and S. Trakumas 1087 Electrical charges on airborne microorganisms

Technical notes

M. Wilck 1111 A general approximation method for solving integrals containing a lognormal weighting function

C. van Gulijk, J. M. Schouten, J. C. M. Marijnissen, M. Makkee and J. A. Moulijn 1117 Restriction for the ELPI in diesel particulate measurements

1131 Book review

1133 Announcement

NUMBER 10

H. T. Kim, K. W. Lee and M. R. Kuhlman — 1135 Exploratory design modifications for enhancing cyclone performance

X. Feng, M. J. Bogan, E. Chuah and G. R. Agnes — 1147 Micro-heterogeneous catalysis at the surface of electrodynamically levitated particles

C. Darquenne — 1161 A realistic two-dimensional model of aerosol transport and deposition in the alveolar zone of the human lung

L. Biasi, A. de los Reyes, M. W. Reeks and G. F. de Santi — 1175 Use of a simple model for the interpretation of experimental data on particle resuspension in turbulent flows

H.-F. Hung and C.-S. Wang — 1201 Experimental determination of reactive oxygen species in Taipei aerosols

C. K. Man and M. Y. Shih — 1213 Identification of sources of PM_{10} aerosols in Hong Kong by wind trajectory analysis

1225 The 16th French Aerosol Conference by ASFERA

NUMBER 11

A. Keller and K. Siegmann — 1235 Effects of second order processes in aerosol monitoring

P. Pesava, H. Horvath and M. Kasahara — 1249 A local optical closure experiment in Vienna

K. Okada, M. Ikegami, Y. Zaizen, Y. Makino, J. B. Jensen and J. L. Gras — 1269 The mixture state of individual aerosol particles in the 1997 Indonesian haze episode

S. Kim, P. A. Jaques, M. Chang, J. R. Froines and C. Sioutas — 1281 Versatile aerosol concentration enrichment system (VACES) for simultaneous in vivo and in vitro evaluation of toxic effects of ultrafine, fine and coarse ambient particles Part I: Development and laboratory characterization

S. Kim, P. A. Jaques, M. Chang, T. Barone, C. Xiong, S. K. Friedlander and C. Sioutas — 1299 Versatile aerosol concentration enrichment system (VACES) for simultaneous in vivo and in vitro evaluation of toxic effects of ultrafine, fine and coarse ambient particles Part II: Field evaluation

X. Qu, E. J. Davis and B. D. Swanson — 1315 — Non-isothermal droplet evaporation and condensation in the near-continuum regime

S.-Y. Lu and C.-T. Lee — 1341 — Thermophoretic motion of an aerosol particle in a non-concentric pore

M. Alonso, F. J. Alguacil and T. Nomura — 1359 — Turbulent deposition of aerosol nanoparticles on a wire screen

H. Park, S. Kim and H. Chang — 1369 — Brownian dynamic simulation for the aggregation of charged particles

Technical note

A. Vargas and X. Ortega — 1389 — The influence of non-uniform particle deposition on the ^{218}Po diffusion coefficient measured with the "two-filter" method

1397 Announcement

NUMBER 12

M. Kostoglou and A. G. Konstandopoulos — 1399 — Evolution of aggregate size and fractal dimension during Brownian coagulation

F. Zheng and E. J. Davis — 1421 — Thermophoretic force measurements of aggregates of micro-spheres

F. Gensdarmes, D. Boulaud and A. Renoux — 1437 — Electrical charging of radioactive aerosols—comparison of the Clement–Harrison models with new experiments

B. K. Ku, S. S. Kim, Y. D. Kim and S. Y. Lee — 1459 — Direct measurement of electrospray droplets in submicron diameter using a freezing method and a TEM image processing technique

H. Struchtrup, M. Luskin and M. R. Zachariah — 1479 — A model for kinetically controlled internal phase segregation during aerosol coagulation
